-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 03 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 08 August 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 08/08/2006 has been entered.
2. Applicant's amendment dated 08/08/2006 has been received and entered. By the amendment, claims 1-9 are now pending in the amendment.
3. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejections as follow.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lee et al., US Patent No. 6,762,807.

Regarding claims 1-2, Lee et al. disclose a side fixing for a liquid crystal display (LCD) device (figure 3) comprising:

. a frame body (410/420);

Art Unit: 2871

- . a pair of extended parts (bending portions at the end of the frame body);
- . a supporting frame (430/440)
- . a first engaging element coupling (416/414) with a first counterpart (432/442);
- . a second engaging element (412/422).

Lee et al. figures 3, however, do not disclose a second engaging element coupling with a second counterpart. Lee et al, in figure 6A, do disclose the second engaging element (512a-d) can be coupled with a second counterpart (532, 534, 542 544) of the supporting frame (530/540). Therefore, it would have been obvious to one skilled in the art at the time of the invention was made to modify the Lee et al. side fixing having the first engaging element coupling with the first counterpart together with the second engaging element coupling with the second counterpart (i.e., extended parts having the first engaging element coupling and frame body having the second engaging element) for the purposes of fixing a frame body and a supporting body together and supporting for an LCD panel.

Regarding claims 3-9, the modification to Lee et al. disclose the claimed invention as described above except for a extended parts length and/or size and shape of the engaging elements. It has been held that changes in length, size and/or shape would have been obvious to one skilled in the art since it would not be patentably distinguishable over the prior art and the selection of any of these known equivalents of lengths, size and/or shape for each component would be within the level of ordinary skill in the art.
